Summary

2x certified Senior Backend Engineer with 7+ years of experience designing, modernizing, and scaling enterprise applications using NodeJS, JavaScript, TypeScript, NestJS and ExpressJS. Strong expertise in PostgreSQL, Microsoft SQL Server, MySQL with proven ability to analyze and refactor legacy systems into modern, maintainable architectures.

Experienced in building scalable enterprise solutions, developing highly available APIs, and handling large scale transactional systems in fintech environments. Skilled in system design, data migrations, and distributed architectures, with hands on experience in cloud platforms (AWS, Azure) and CI/CD pipelines.

Adept at debugging complex systems, improving code quality, and leveraging AI assisted development tools such as Github Copilot to accelerate delivery while maintaining engineering standards.

- **Backend:** Node.js, Express.js, NestJS, TypeScript, JavaScript, REST APIs, Microservices, TDD (Jest, Mocha, Supertest)
- **Frontend:** ReactJS, Next.js, Angular, HTML, CSS, JavaScript
- **Cloud & DevOps:** AWS (Lambda, EC2, S3, RDS, SNS, Elastic Beanstalk), Azure (App Service, VMs, Blob Storage), Docker, CI/CD pipelines
- **Databases:** PostgreSQL, MongoDB, MySQL, MSSQL, Redis, Oracle
- **Messaging & Event Systems:** Kafka, RabbitMQ, BullMQ, Redis Pub/Sub
- **Project Management & Collaboration:** Jira, Trello, Azure Boards, Slack, Microsoft Teams

Experience

Senior Backend Developer

FCMB Group

Mar 2024 - Present

- Led the backend team managing core applications: smecollect.com, businesszone.com, Financial Authentication Service (FAS).
- Mentored junior developers in microservices architecture, REST API best practices, and database optimization on platforms like Codebar.io, Zoom meetings.

Senior Software Engineer

Smart Power Billing (Sterling Technologies)

Apr 2022 - Mar 2024

- Managed a small team that worked on these applications: QuikPay, Diaspora Billing, Quikcash, ERPs applications for organizations like BEDC, EEDC and Geometric (APLEs)
- Designed and built high-scale backend services using TypeScript and NestJS, supporting a distributed financial platform serving 15M+ users and billions in monthly transaction volume
- Architected and maintained event-driven systems (Kafka, Redis Pub/Sub, RabbitMQ), implementing producer/consumer workflows, asynchronous processing etc
- Built data processing pipelines to handle high throughput transaction events, applying validation, transformation (ETL like logic), and ensuring reliable downstream processing
- Modeled and optimized PostgreSQL databases, including schema design, indexing strategies, and query tuning to improve performance under heavy load
- Implemented caching and rate-limiting strategies using Redis, improving system responsiveness and reducing database load
- Designed systems for scalability and resilience, incorporating idempotency, horizontal scaling patterns, and fault-tolerant processing for financial transactions
- Worked in containerized environments (Docker) and collaborated on scalable deployment strategies aligned with cloud-native principles

- Implemented logging, monitoring, and debugging strategies, improving observability and reducing incident resolution time in production systems
- Collaborated with cross functional teams to deliver features end to end, consistently contributing to frontend development using React and Next.js
- Leveraged AI assisted development (Claude, ChatGPT) tools to accelerate implementation, debugging, and code quality improvements

Full Stack Web Engineer

First Bank of Nigeria Ltd.

Feb 2021 - Feb 2022 (1 year 1 month)

- Led a two-person team to develop a service-based application automating interbank dispute resolution, resolving 90%+ of daily disputes.
- Developed APIs using .Net Framework and ReactJS for frontend interfaces, improving system responsiveness and scalability.
- Managed deployment and server maintenance using automated scripts and CI/CD tool

Software Engineer

Jensiv Limited

Sep 2018 - Dec 2020 (2 years 4 months)

- Collaborated with a team of developers and operations to launch ScenicPlots, a mobile based app for storytellers to showcase stories to movie producers, agents, and streaming networks
- Initially using Xamarin(C#) then migrating to JavaScript and React Native for the Mobile, Python (Django) for the back-end , Git and MySQL, Deployed Containerized application to Heroku, supporting 1000+ published stories and 100+ active writers in West Africa.

Education

Middlesex University

Bachelor of Science - BS, Computer Science
2015 - 2018

Licenses & Certifications

ADSE - APTECH Computer Education (2015)

AWS Certified Cloud Practitioner - AWS (2025)

AWS Certified Solutions Architect - AWS (2026)
